

Excellence. Delivered.

Collaboration brings sub-specialty radiology to BDCH

Beaver Dam Community Hospitals has teamed up with Milwaukee Radiologists to provide patients with the best diagnostic and interventional radiology services in the region

Milwaukee Radiologists LTD is a premiere sub-specialized radiology group featuring 35 board-certified radiologists.

Using teleradiology to consult with offsite sub-specialty radiologists, BDCH patients have access to the most advanced medical imaging interpretations in their own community. In addition, onsite specialized radiologists offer personalized care for digital mammography, ultrasounds and interventional radiology.

“For one physician, it’s almost impossible to be excellent at all facets of radiology, there’s too much to know. What we’re doing is bringing sub-specialty radiology to BDCH.”

Through Milwaukee Radiologists, BDCH patients receive expert imaging interpretations along a wide range of specialties, including:

- Womens Imaging
- Body Imaging
- Interventional Radiology
- Mammography
- Nuclear Medicine
- Musculoskeletal
- Neuroradiology

“By consulting sub-specialty radiologists, patients have fewer return visits for questionable findings, and cancers are picked up at earlier stages.”

“Teleradiology has made it possible for Beaver Dam Community Hospital to function as well as a tertiary care center because you have the same sub-specialty radiologists providing expert imaging interpretation. That’s a big advantage. It’s the wave of the future, and it’s already at Beaver Dam Community Hospital.”

~ Dr. Mark Wenzel, Medical Director of Imaging, BDCH
